A new Hermite-Hadamard type inequality for $h$-convex functions

MUHAMMAD ASLAM NOOR, KHALIDA INAYAT NOOR and MUHAMMAD UZAIR AWAN

ABSTRACT

In this paper, we derive a new refinement of Hermite-Hadamard inequality for the class of $h$-convex functions. We also discuss some new and known special cases which can be obtained from our main results. Results obtained in this paper may be viewed as significant improvement of the known results.
